UNDERGROUND STATION

USE OF ANTI-GRAFFITI SURFACE PROTECTION

OVERVIEW

PROJECT Underground Station

PRODUCT SICOROL GS (anti-graffiti)

EXPANSE 900m²

REGION Bavaria (D-90)

PRODUCT FEATURES

Our Surface protection products have been developed to provide longlasting protection to concrete surfaces and elements against moisture penetration, efflorescence, oil and other chemical influences (e.g. graffiti). The main cause of weathering and building damage is water, which itself can carry pollutant emmissions, micro-organisms and salts which gradually, over time, can cause serious damage to the concrete.

AREAS OF APPLICATION

- Cladding
- Pre-cast elements
- Concrete products
- Bespoke elements
