

# INDUSTRIAL FLOOR (AUTOHAUS SINGER) USE THE FIBROFOR HIGH GRADE MICROFIBRE

## OVERVIEW

<b>PROJECT</b>	Showroom in the car dealership, D-876
<b>PRODUCT</b>	High Grade 19 mm
<b>EXPANSE</b>	485 m <sup>2</sup>
<b>REGION</b>	Bavaria (D-87)
<b>MISC</b>	on XPS insulation

## PRODUCT FEATURES

For this construction project, the statically chargeable synthetic **microfibre HIGH GRADE** was used for a 20 cm thick industrial floor on XPS insulation (10 cm). The cut joint grid is 5 x 5 m in the interior area. The specially developed spliced fibre is suitable for low to medium loads. It has a positive influence on the shrinkage behaviour of the concrete, spreads very well in the concrete and can be worked into the surface optimally.

## ADVANTAGES

- » Reinforcement construction is eliminated or reduced (cost and time saving)
- » Structural design according to Eurocode 2
- » Jointless surfaces up to 1.000 m<sup>2</sup>
- » No corrosion
- » Resistant to salt water and aggressive liquids
