

INDUSTRIAL FLOOR, OUTSIDE SURFACE PRODUCTION HALL USE THE FIBROFOR HIGH GRADE

OVERVIEW

PROJECT Industrie floor, Outside surface, production hall Germany D-588

PRODUCT Fibrofor High Grade 19

EXPANSE 10.000 m²

REGION Bavaria (D-87)

PRODUCT FEATURES

For this concrete project we use the High Grade Microfibre 19. High Grade is a fibrillated, high-performance fibre for the structural reinforcement of concrete. It can not only replace the use of steel fibres but can reduce and even eliminate the requirement for traditional steel reinforcement.

ADVANTAGES

- » Economical alternative to steel reinforcement
- » No protrusion or corrosion of fibres on the surface
- » Static calculations made in accordance with Eurocode 2
