

INDUSTRIAL WAREHOUSE AND STORES USE OF HIGH GRADE FOR CONCRETE SLAB CONSTRUCTION

OVERVIEW

PROJECT Industrial Warehouse and Stores

PRODUCT High Grade

EXPANSE 1,800 m²

REGION Bavaria (D-97)

PRODUCT FEATURES

High Grade is a fibrillated high-performance fibre for structural concrete reinforcement. It can replace steel fibres and reduce or replace steel reinforcement.

ADVANTAGES

- » Economical alternative to steel reinforcement
- » No fibres/corrosion on the surface
- » Static design is carried out in accordance with Eurocode 2
