FABRINO

THE COMPANY

FABRINO develops innovative specialty solutions for architectural concrete, concrete finishing, and structural reinforcement.

Since its founding in 2005, the owner-managed company, based near Memmingen in the Allgäu region, has stood for technical expertise, high-quality products, and practical development solutions for the construction and concrete industries.

FABRINO was founded by Dr. Klaus Hörmann together with Jochen Reisacher, who helped shape the company until 2010.

Today, FABRINO combines many years of industry experience with a high degree of innovation and a clear focus on sophisticated concrete surfaces, high-performance concrete systems, and modern architecture.

Customers from industry, architecture, and the construction sector value FABRINO as a reliable development partner with strong consulting expertise, fast decision-making processes, and in-depth technical know-how.

RESEARCH & DEVELOPMENT

Innovation is a central component of FABRINO's corporate philosophy.

In close collaboration with universities, research institutions, and experienced industry partners, FABRINO continuously develops new products and application-specific solutions for modern concrete architecture and high-performance concrete building materials.

The combination of research, technical development, and architectural excellence continues to define the FABRINO brand to this day.

THE FOCUS IS ON:

- High-quality concrete surfaces
- Structural performance
- Efficient processing
- Sustainable system solutions
- Practical product development

PRODUCT CATEGORIES

ARCHITECTURAL CONCRETE & CONCRETE FINISHING

FABRINO offers high-quality specialty products for the design, finishing, and protection of modern concrete surfaces.

FABRINO's solutions are used worldwide in high-quality exposed concrete facades, infrastructure projects, public buildings, and architecturally sophisticated structures.

THE PRODUCT PORTFOLIO INCLUDES:

- Surface retarders
- Etching gels for achieving a sandstone look
- Liquid paints, pigments, and dosing systems
- Surface protection systems and graffiti protection
- Photo-concrete and custom design surfaces
- Colored glass granules and special aggregates
- Release agents and mix protection systems

HIGH-PERFORMANCE FIBERS & CONCRETE REINFORCEMENT

FABRINO develops high-performance fiber solutions for structural concrete reinforcement and industrial applications.

APPLICATION AREAS:

- Industrial floors
- Precast concrete elements
- Shotcrete
- Exterior concrete surfaces
- Tunnel and track construction
- Industrial and commercial buildings

PRODUCT SOLUTIONS:

- Microfiber solutions
- Macrofiber systems
- Natural fiber solutions

EXPERTISE & CONSULTING

FABRINO combines technical expertise with practical consulting.

The team consists of experienced application engineers and specialists with in-depth knowledge of concrete technology, building material development, and industrial production processes.

OUR FOCUS IS ON:

- Customized project consulting
- Application-specific solutions
- Strong service orientation
- Rapid technical support
- Collaborative partnerships

CUSTOMERS & APPLICATION AREAS

FABRINO collaborates with companies and planners from a wide range of sectors within the construction industry:

APPLICATION AREAS:

- Precast concrete industry
- Engineered stone and concrete products industry
- Ready-mix concrete industry
- Industrial flooring
- Industrial and commercial building construction
- Tunnel and track construction
- Architectural and planning firms
- General contractors and construction companies

SELECTED PROJECTS:

DIN Building, Berlin | Stuttgart 21 Tunnel
Eastside V-VIII | Humboldt Forum, Berlin
German Olympic Sports Confederation
BMW Welt, Munich | European Court of Auditors, Luxembourg
Friedrichstadt-Palast, Berlin
Leica Wetzlar | TU Dresden
Volkswagen Braunschweig
Dancing Towers Hamburg
as well as numerous retail and commercial buildings across Europe.

DR. KLAUS HÖRMANN

MANAGING DIRECTOR

Dr. Klaus Hörmann has many years of experience in the concrete and construction industry, as well as in the development of innovative concrete systems and specialized solutions for architectural concrete.

In addition to his entrepreneurial activities, he is actively involved in scientific exchange with universities and research institutions and has, among other things, taught at the university level.

The combination of technical expertise, research, design acumen, and practical relevance shapes FABRINO's strategic direction.
